

Smart Grid R&D Tax Credit

- ❖ Investment Analysis
- ❖ Claim Strategy
- ❖ Support Documentation

Do the economic benefits of State and Federal R&D Tax Credits for Smart Grid deployment expenditures play a role in your technology investment decision making?

Dynamic Energy Group's Smart Grid Team can lead your tax analysts in the development of relevant strategies and provide the necessary documentation to support successful R&D claims.

DEG has a successful track record for the development of comprehensive strategies that provide justification for nearly all project costs, whether hard or soft. These strategies have been developed to accommodate State and Federal tax codes and applicability tests. Resulting Tax Credits yield real dollars to the bottom line, providing meaningful shareholder benefits.

Dynamic Energy Group has successfully helped small and large utilities take maximum advantage of State and Federal R&D Tax Credit provisions. Let us provide a **free** consultation to determine how we can assist you.

Dynamic Energy Group (DEG) is a privately owned, independent consulting group dedicated to the practice of engineering, design, analysis and related consulting support services. Our primary focus is on the electricity distribution market.

With over 25 years of industry experience, **DEG** has developed extensive expertise through the management and analysis of technology integration and capital projects in the utility, communications/telecommunications and cyber security sectors throughout the US and overseas.

DEG team members are accustomed to working with a broad cross-section of electricity distribution personnel. We tailor our services to meet specific needs, supporting our customers in meeting core business objectives.
